

[Cat. No.] K-2969

Introduction

AccuPower® Enterococcus faecalis Real-Time PCR Kit is a product that can detect *Enterococcus faecalis* (*E. faecalis*), one of the major enterococci, by real-time PCR.

E. faecalis is a gram-positive bacterium found in soil, water, and plants as well as human and livestock intestines. *E. faecalis* causes food poisoning, periodontitis, urinary tract infection, and wound infection. In addition, it can survive in high salt and temperatures, it is easily found even in products that have undergone salt treatment and sterilization treatment. It is also known to be resistant to strong antibiotics such as vancomycin.

This product contains all Real-time PCR components specific to *E. faecalis*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.

Components

Components	Amount
2X Master Mix	625 µl x 2
Oligo Mix	500 µl
DEPC-D.W.	1.8 ml
Positive Control (1x108 copies/µI)	50 μl

^{*} Note: For research use only. Not for use in diagnostic or therapeutic procedures.

Composition

	Composition	25 μl reaction
2X Master Mix	Taq DNA Polymerase	2 U
	dNTPs (dATP, dCTP, dGTP, dTTP)	Each 300 µM
	Reaction buffer with 2 mM MgCl ₂	1X
Oligo Mix	E. faecalis Forward primer	0.32 μΜ
	E. faecalis Reverse primer	0.32 μΜ
	E. faecalis Probe (FAM)	0.32 μΜ
	ROX dye	1X

Specifications

Taq DNA Polymerase				
5'→3' exonuclease activity	Yes			
3'→5' exonuclease activity	No			
3'-A overhang	Yes			

Storage

Store at -20°C. If stored in the recommended temperature, this product will be stable until the expiration date printed out on the label.

Experimental Procedures

	Steps	Procedure Details				
1	Preparation of reaction mixture	Thaw all components of <i>AccuPower</i> ® Enterococcus faecalis Real-Time PCR Kit on ice and mix thoroughly before use. Then, briefly spin down all components.				
2	Composition of reaction mixture	2. Add all components into PCR tubes (not provided) or to the following list of components (Based on 1 test). Components 2X Master Mix Oligo Mix Template DNA DEPC-D.W. Total volume		test). Am 12. 5 1-t		
3	Real-time PCR	3. Place PCR tubes or plate 4. Perform the reaction und Step Pre-denaturation Denaturation Annealing & Extension * Note: Users can adjust the proptimal results. 5. After the reaction is comp	er the following condition Temperature 95°C 95°C 55°C rotocol according to their	ons. Time 5 min 10 sec 20 sec instrument and temp	Cycles 1 cycle 45 cycles
