## Introduction

*AccuPower*<sup>®</sup> Glaesserella parasuis Real-Time PCR Kit is a product that can specifically detect *Glaesserella parasuis* (*G. parasuis*) by real-time PCR.

*G. parasuis* is a gram -negative bacterium known as one of the pathogens that cause the respiratory infection and multiple tentitis of pigs. *G. parasuis,* opportunistic bacteria, infects pigs with weakened immunity and may have symptoms such as pneumonia, cramps, vitality, arthritis, etc. during infection.

This product contains all Real-time PCR components specific to *G. parasuis*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

#### **Features & Benefits**

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart *Taq* DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
