Introduction

AccuPower® Flavobacterium columnare Real-Time PCR Kit is a product that can specifically detect Flavobacterium columnare (F.columnare) by real-time PCR.

F. columnare is a gram-negative bacterium known as one of the causative agents of columnaris disease. F. columnare is only pathogenic to subtropical fish. F. columnare may show signs of erosion at the infection site.

This product contains all Real-time PCR components specific to F. columnare, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart *Taq* DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
