# [Cat. No.] K-2982

## Introduction

*AccuPower*<sup>®</sup> Vibrio ichthyoenteri Real-Time PCR Kit is a product that can specifically detect *Vibrio ichthyoenteri* (*V. ichthyoenteri*) by real-time PCR.

*V. ichthyoenteri* is a gram-negative bacterium known to be one of the causative agents of Vibrio intestinal turbidity. *V. ichthyoenteri* is pathogenic to flounder fry. Infected flatfish become lethargic, lose their appetite, and die due to cloudy or ulcerated digestive tracts. This product contains all Real-time PCR components specific to *V. ichthyoenteri*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

## **Features & Benefits**

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart *Taq* DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.

#### Components

| Components                                     | Amount     |  |  |
|--|------------|--|--|
| 2X Master Mix                                  | 625 µl x 2 |  |  |
| Oligo Mix                                      | 500 µl     |  |  |
| DEPC-D.W.                                      | 1.8 ml     |  |  |
| Positive Control (1x10 <sup>8</sup> copies/ul) | 50 ul      |  |  |

\* Note: For research use only. Not for use in diagnostic or therapeutic procedures.

## Composition

|                  | Composition                        | 25 µl<br>reaction |
|------------------|------------------------------------|-------------------|
|                  | Taq DNA Polymerase                 | 2 U               |
| 2X Master<br>Mix | dNTPs (dATP, dCTP, dGTP, dTTP)     | Each 300 µM       |
|                  | Reaction buffer with 2 mM $MgCl_2$ | 1X                |
|                  | V. ichthyoenteri Forward primer    | 0.6 µM            |
| Oligo Mix        | V. ichthyoenteri Reverse primer    | 0.6 µM            |
| Oligo Iviix      | V. ichthyoenteri Probe (FAM)       | 0.6 µM            |
|                  | ROX dye                            | 1X                |

#### **Specifications**

| Taq DNA Polymerase                       |     |  |  |  |  |
|--|-----|--|--|--|--|
| 5' $\rightarrow$ 3' exonuclease activity | Yes |  |  |  |  |
| 3'→5' exonuclease activity               | No  |  |  |  |  |
| 3'-A overhang                            | Yes |  |  |  |  |

#### Storage

Store at -20°C. If stored in the recommended temperature, this product will be stable until the expiration date printed out on the label.
