# [Cat. No.] K-6804

## Introduction

*AccuPower*<sup>®</sup> Campylobacter coli Real-Time PCR Kit is a product that can specifically detect *Campylobacter coli* (*C. coli*) by real-time PCR. *C. coli* is a gram-negative bacterium that causes

Campylobacteriosis. *C. coli* is known to cause acute gastroenteritis, as *C. jejuni*, another bacterium of the genus Campylobacter. It is most commonly infected by eating insufficiently cooked meat such as cattle, or pigs, or poultry and accompanied by symptoms such as diarrhea, stomachache, and fever. In particular, Campylobacteriosis accounts for 5 to 14% of the causes of diarrhea worldwide. In most cases, recovery takes 2 to 5 days, but some patients with weakened immunity may become chronically ill.

This product contains all Real-time PCR components specific to *C. coli*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

## **Features & Benefits**

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart *Taq* DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.

#### Components

Components	Amount
2X Master Mix	625 µl x 2 ea
Oligo Mix	500 µl
DEPC-D.W.	1.8 ml
Positive Control (1x10 <sup>8</sup> copies/µI)	50 µl

\* Note: For research use only. Not for use in diagnostic or therapeutic procedures.

## Composition

	Composition	25 μl reaction
	Taq DNA Polymerase	2.5 U
2X Master Mix	dNTPs (dATP, dCTP, dGTP, dTTP)	Each 300 µM
	Reaction buffer with 2 mM MgCl <sub>2</sub>	1X
	C. coli Forward primer	0.4 µM
Oligo Mix	C. coli Reverse primer	0.4 µM
Oligo Mix	C. coli Probe (FAM)	0.4 µM
	ROX dye	1X

#### Specifications

Taq DNA Polymerase				
5'→3' exonuclease activity	Yes			
3'→5' exonuclease activity	No			
3'–A overhang	Yes			

#### Storage

Store at -20°C. If stored in the recommended temperature, this product will be stable until the expiration date printed out on the label.
