Introduction

AccuPower® Cronobacter sakazakii Real-Time PCR Kit is a product that can specifically detect Cronobacter sakazakii (C. sakazakii) by real-time PCR.

C. sakazakii is a gram-negative bacterium that causes meningitis, sepsis, and necrotizing enterocolitis in infants under the age of 1 month. Before 2007, it was given the name Enterobacter sakazakii, but has been renamed as Cronobacter because of its danger to infants. C. sakazakii is vulnerable to heat, so infection can be prevented simply by washing dishes and feeding bottle at high temperature, those that are in direct contact with infants. In general, adults have a few or mild symptoms.

This product contains all Real-time PCR components specific to C. sakazakii, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
