#### [Cat. No.] K-6827

#### Introduction

AccuPower® Bacteroides thetaiotaomicron Real-Time PCR Kit is a product that can specifically detect Bacteroides thetaiotaomicron (B. thetaiotaomicron) by real-time PCR.

B. thetaiotaomicron is a gram-negative bacterium that causes peritonitis, sepsis, or suppurative arthritis. B. thetaiotaomicron is a part of the intestinal flora residing in the gastrointestinal tract and is an opportunistic pathogen that exhibits pathogenic properties through infection with intestinal wounds. In addition, it is a pathogen that needs to be careful not only because of direct infection to other tissues but also because the substance produced during the metabolic process contributes to the growth of other pathogens. This product contains all Real-time PCR components specific to B. thetaiotaomicron, including DNA polymerase, dNTPs, and a reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix, and DEPC-D.W.

#### **Features & Benefits**

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.

## Components

Components	Amount
2X Master Mix	625 µl x 2 ea
Oligo Mix	500 μΙ
DEPC-D.W.	1.8 ml
Positive Control (1x10 <sup>8</sup> copies/µI)	50 µl

<sup>\*</sup> Note: For research use only. Not for use in diagnostic or therapeutic procedures.

# Composition

	Composition	25 μl reaction
	Taq DNA Polymerase	2.5 U
2X Master Mix	dNTPs (dATP, dCTP, dGTP, dTTP)	Each 300 µM
······×	Reaction buffer with 2 mM MgCl <sub>2</sub>	1X
	B. thetaiotaomicron Forward primer	0.4 μΜ
Oligo Mix	B. thetaiotaomicron Reverse primer	0.4 μΜ
ŭ	B. thetaiotaomicron Probe (FAM)	0.4 μΜ
	ROX dye	1X

# **Specifications**

Taq DNA Polymerase				
5'→3' exonuclease activity	Yes			
3'→5' exonuclease activity	No			
3'–A overhang	Yes			

#### Storage

Store at -20°C. If stored in the recommended temperature, this product will be stable until the expiration date printed out on the

# **Experimental Procedures**

Steps Procedure Deta			tails		
1	Preparation of reaction mixture	Thaw all components of <i>AccuPower</i> ® Bacteroides thetaiotaomicron Real-Time PCR Kit on ice and mix thoroughly before use. Then, briefly spin down all components.			
2	Composition of reaction mixture		ts into PCR tubes (not provided) or a plate (not provided) referring of components (Based on 1 test).  Ponents  Amount  12.5 µl  5 µl  1-5 µl  Variable  25 µl		
3	Real-time PCR	3. Place PCR tubes or plate on the Real-Time Quantitative thermal cycler.  4. Perform the reaction under the following conditions.    Step   Temperature   Time   Cycles
