Introduction

AccuPower® Actinomyces viscosus Real-Time PCR Kit is a product that can specifically detect Actinomyces viscosus (A. viscosus) by real-time PCR.

A. viscosus is a gram-positive bacterium that causes tooth decay. and in rare cases sepsis or endocarditis. A. viscosus is a microorganism that exists in the oral cavity of adults and is known to be involved in the pathogenesis of tooth decay, especially root caries. If there is a problem with oral health, such as a wound in the mouth, it may cause sepsis or endocarditis, and if accompanied by purulent drainage, it is diagnosed as actinomycosis.

This product contains all Real-time PCR components specific to A. viscosus, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix, and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Tag DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
