

[Cat. No.] K-6855

Introduction

AccuPower® Prevotella nigrescens Real-Time PCR Kit is a product that can specifically detect *Prevotella nigrescens* (*P. nigrescens*) by real-time PCR.

P. nigrescens is part of the normal oral flora frequently found in the human gingiva. When certain microbes increase in the oral flora, the immune system over-attacks, leading to various diseases. Among these microorganisms, *P. nigrescens* forms colonies on the tooth surface. And it causes inflammation of the oral tissues, which leads to periodontitis. In addition, it can also cause nasopharyngeal and intra-abdominal infections, and is recently known to be related to arteriosclerosis.

This product contains all Real-time PCR components specific to *P. nigrescens*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix, and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.

Components

| Components | Amount |
|------------------------------------------------|---------------|
| 2X Master Mix | 625 µl x 2 ea |
| Oligo Mix | 500 μΙ |
| DEPC-D.W. | 1.8 ml |
| Positive Control (1x10 ⁸ copies/µI) | 50 µl |

^{*} Note: For research use only. Not for use in diagnostic or therapeutic procedures.

Composition

| | Composition | 25 μl reaction |
|------------------|---------------------------------------------|-------------------|
| | Taq DNA Polymerase | 2.5 U |
| 2X Master Mix | dNTPs (dATP, dCTP, dGTP, dTTP) | Each 300 µM |
| · · · · · | Reaction buffer with 2 mM MgCl ₂ | 1X |
| | P. nigrescens Forward primer | 0.4 µM |
| Oliga Miy | P. nigrescens Reverse primer | 0.4 µM |
| Oligo Mix | P. nigrescens Probe (FAM) | 0.4 µM |
| | ROX dye | 1X |

Specifications

| Taq DNA Polymerase | | | | |
|----------------------------|-----|--|--|--|
| 5'→3' exonuclease activity | Yes | | | |
| 3'→5' exonuclease activity | No | | | |
| 3'-A overhang | Yes | | | |

Storage

Store at -20°C. If stored in the recommended temperature, this product will be stable until the expiration date printed out on the label
