Introduction

AccuPower® Klebsiella planticola Real-Time PCR Kit is a product that can specifically detect *Klebsiella planticola* (*K. planticola*) by real-time PCR.

K. planticola is a gram-negative bacillus that can be found in soil, water and plants, and some can be found in the human gastrointestinal tract. It mainly causes urinary tract and wound infections in humans with *K. pneumoniae*. It is also rarely the cause of pancreatitis. *K. planticola* is very similar in appearance to *K. pneumoniae*, so it is often confused but it can be identified by DNA analysis.

This product contains all Real-time PCR components specific to *K. planticola*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix, and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
