### Introduction

*AccuPower*<sup>®</sup> Bacteroides fragilis Real-Time PCR Kit is a product that can specifically detect *Bacteroides fragilis* (*B. fragilis*) by real-time PCR.

*B. fragilis* is a gram-negative bacterium known to cause primarily peritonitis and bacteremia. *B. fragilis* is a normal flora that is found in the intestines of the human body, especially in the colon. The toxins produced by *B. fragilis* can cause inflammatory diarrhea and inflammatory bowel disease. It can also cause intra-abdominal infections due to wounds to the intestinal tissue barrier or bacteremia due to inflow into the bloodstream.

This product contains all Real-time PCR components specific to *B. fragilis*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

#### **Features & Benefits**

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart *Taq* DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
