Introduction

AccuPower® Proteus penneri Real-Time PCR Kit is a product that can specifically detect *Proteus penneri* (*P. penneri*) by real-time PCR.

P. penneri is a gram-negative bacterium known to mainly cause urinary tract infections and bacteremia. It is most frequently detected in urine, and known infect urinary tract, blood and abdominal wounds. P. penneri has been classified relatively recently, and has a similar pathogenicity with P. mirabilis or P. vulgaris, which may lead to clinical misdiagnosis.

This product contains all Real-time PCR components specific to *P. penneri*, including DNA polymerase, dNTPs, and reaction buffer. The users can easily prepare a reaction mixture simply by adding template DNA, Oligo Mix and DEPC-D.W.

Features & Benefits

- Convenience: All necessary reactants for real-time PCR are included in a tube (i.e., Master Mix Type), allowing the users to perform reaction simply by adding template DNA, Oligo Mix, and DEPC-D.W.
- Sensitivity: By using BIONEER's HotStart Taq DNA Polymerase that minimizes non-specific reactions and maximizes reaction efficiency, only the target gene can be effectively amplified even with a trace amount of template DNA.
