Suitable extinguishing media: Water, Foam, Carbon dioxide (CO2), Dry powder.

Unsuitable extinguishing media: For this mixture no limitations of extinguishing agents are given.

B. Specific hazards arising from the chemical (Example: Hazardous substances generated during combustion) :

Material may produce irritating and highly toxic gases from decomposition by heat and combustion during burning.

When heated, vapors may form explosive mixtures with air: explosion hazards indoors, outdoors and in sewers

C. Special protective actions for firefighters :

Rescuers should put on appropriate protective gear.

Evacuate area and fight fire from a safe distance.

Move containers from fire area if you can do it without risk.

6. ACCIDENTAL RELEASE MEASURES

A. Personal precautions, protective equipment :

Avoid breathing dust/fume/gas/mist/vapors/spray.

Clean up spills immediately, observing precautions in '8. EXPOSURE CONTROLS/PERSONAL PROTECTION' section.

Isolate hazard area.

Keep unnecessary and unprotected personnel from entering.

Eliminate all ignition sources.

Stop leak if you can do it without risk.

Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

B. Environmental precautions :

Runoff from fire control may be corrosive and/or toxic and cause pollution.

Prevent entry into water ways, sewers, basements or confined areas.

C. The methods of purification and removal :

Absorb spills with inert material (e.g., dry sand or earth), then place in a chemical waste container.

Reduce dust and prevent scattering by moistening with water.

Dissolve in water and collect for proper disposal.

Absorb the liquid and scrub the area with detergent and water.

7. HANDLING AND STORAGE

A. Precautions for safe handling :

Do not handle until all safety precautions have been read and understood.

Use carefully in handling/storage.

Use only outdoors or in a well-ventilated area.

Loosen closure cautiously before opening.

Avoid breathing dust/fume/gas/mist/vapors/spray.

Wash your hands thoroughly after handling.

Avoid prolonged or repeated contact with skin.

Contaminated work clothing should not be allowed out of the workplace.

Follow all MSDS/label precautions even after container is emptied because they may retain product residues.

B. Conditions for safe storage, including any incompatibilities :

Store in a cool, well-ventilated place. Keep container tightly closed.

Do not apply any physical shock to container.

Avoid direct sunlight.

Keep in the original container.

Please pay attention to incompatibilities materials and conditions to avoid.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

A. Occupational Exposure Limits :

No data available.

B. Appropriate engineering controls :

Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits.

If user operations generate dust, fume, or mist, use ventilation to keep exposure to airborne contaminants below the recommended exposure limit.

Facilities for storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

다. Personal Protective Equipment :

○ Respiratory protection :

Uses respirator when vapours/aerosols are generated.

Use a European Standard EN 149 (or other accompanying standards relating to the used respiratory protection system) approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

○ Eye protection :

Wear the protective glasses or breathable safety goggles to protect from vaporous state organic material causing eye irritation or other disorder.

An eye wash unit and safety shower station should be available nearby work place.

○ Hand protection :

Wear appropriate protective gloves by considering physical and chemical properties of chemicals.
